

Entrepreneurship as a main driver for economic growth

The European Commission's Entrepreneurship Action Plan is a blueprint for decisive action to unleash Europe's entrepreneurial potential, to remove existing obstacles and to revolutionise the culture of entrepreneurship in Europe. Investments in changing the public perception of entrepreneurs, in entrepreneurship education and to support groups that are underrepresented among entrepreneurs are indispensable if we want to create enduring change. Only if a large number of Europeans recognise an entrepreneurial career as a rewarding and attractive option will entrepreneurial activity in Europe thrive in the long term.
