

Intel publishes 2012 Corporate Responsibility Report

Intel has released its 2012 Corporate Responsibility Report, detailing the progress of the goals set as part of the company's embedded corporate responsibility structure.

Key highlights include:

- Intel continued to be the largest voluntary purchaser of green power in the U.S., according to the U.S. Environmental Protection Agency (EPA), and received the EPA's Sustained Excellence in Green Power Award;
- Employees were empowered to give back to their communities through the Intel Involved program, resulting in more than 1 million hours of service in 2012;
- Intel's education transformation strategy was advanced by developing new technology solutions, and reached 7 million students through the Intel International Science and Engineering Fair, a program of Society for Science & the Public;
- The launch of the "Girl Rising" film and 10x10 social action campaign, sponsored by Intel, which highlight the importance of investing in the education of girls and women to advance economic opportunity;
- Details from the Supplier Sustainability Leadership Summit in China, which brought together executives from our top suppliers, government officials, leading NGOs, the media, and academics; and
- The success of Intel's goal to manufacture a microprocessor that is "conflict-free" for tantalum; Intel was one of the first companies to set public goals related to "conflict minerals."
- A dedicated web page provides access to the report as well as more information on Intel's approach to integrated reporting and the 'build your own' report platform.
