

CSR Europe participates in European Commission's "Agenda for Change"

Building on the Europe2020 strategy and on the “Agenda for Change”, the European Commission (DG Development) is now preparing a new communication on the role of private sector in development, “Strengthening the Role of the Private Sector in Achieving Inclusive and Sustainable Growth in Developing Countries” for adoption in June 2014. The communication will seek to strengthen the role of the private sector by engaging the European, international and local private sector through joint actions and structured dialogue.

Following our publication issued in Summer 2012 as a result of our collaborative project “Inclusive Business Models. Smart, Sustainable and Inclusive Growth at the Base of the Pyramid”, as well as our contribution at the European Development Days, CSR Europe has been further approached by the European Commission to participate in the latest consultation.

We offer our members the opportunity to share their insights and feedback (by writing) on the EU Issue Paper by 14 February. The issue paper can be accessed [here](#).(member only content, to access the document firstly,register/login into website as a member and then click here). This will also be further discussed at the next EU Update Webinar on 13 February at 11:00 CET.
