

## BP sustainability reporting 2015

Our sustainability reporting looks at the impact of our business on the environment, the societies and the economies in which we operate

### Highlights include:

- BP's view of climate change and how we are working towards a lower-carbon future.
- How we contribute to local economies through our core business activities as well as through our social investments.
- Actions we are taking to create and maintain a safe operating culture.
- Q&As with BP subject matter experts on topics such as our US Lower 48 onshore business, cybersecurity, managing methane emissions and human rights in the supply chain.
- Data on our safety, environmental and social performance, along with our key performance indicators in these areas.

Additional information is available at [bp.com/sustainability](http://bp.com/sustainability), including case studies and an interactive charting tool that filters our health, safety and environment data. You can also download issues briefs on oil sands and hydraulic fracturing.
