

LafargeHolcim publishes first Sustainability Report for merged Group

LafargeHolcim this week released its Sustainability Report 2015 that outlines the Group's economic, environmental and social performance and presents LafargeHolcim's ambitious objectives as part of its new sustainability strategy, The 2030 Plan. The report confirms that LafargeHolcim is leading the industry as the international cement manufacturer with the lowest CO2 emissions per tonne of cement . It also shows that the Group has made progress in a variety of fields such as the reduction of atmospheric emissions such as dust or NOX, the increased use of alternative fuels in its cement kilns, and the rehabilitation of quarries.

The report can be downloaded from <http://www.lafargeholcim.com/reports-publications>

Eric Olsen, CEO of LafargeHolcim, said: "Sustainability is one of the four pillars in our corporate strategy. It determines the way we operate and defines the solutions that we offer our customers. It also encapsulates our determination to provide leadership within the construction sector and drive transformation. We will do this through the LafargeHolcim 2030 Plan. The overarching ambition of the plan is to transform our business and ensure that by 2030, one third of our revenue comes from products, services, and solutions offering enhanced sustainability performance."
