

Flowserve Announces Availability of 2016 Sustainability Report:Company Celebrates Record-Setting Sustainability Metrics for 3rd Consecutive Year

The 2016 Sustainability report for Flowserve includes information regarding the Flowserve Flow Control Division (FCD), the Engineered Product Operation (EPO) and the Industrial Product Division (IPD). The report provides general information regarding Flowserve Corporation, including a statement from the CEO, an overview of the Flowserve approach to sustainable development, and information regarding our stakeholders, governance, and marketplace initiatives using 2016 data.

The report highlights information specific to FCD, EPO and IPD for various performance indicators and metrics, based on the Global Reporting Initiative (GRI) reporting framework and guidelines. Key indicators were selected based on review of the overall GRI indicator list, and include those that are relevant to Flowserve manufacturing, service and repair operations. The report highlights information specific to all Flowserve operating divisions and locations for the first time.

The data collection is based on a broad range of quantitative and qualitative information from all locations around the world representing all Flowserve product offerings and countries of operation. This report includes all types of Flowserve operating facilities and provides a comprehensive summary of our corporate sustainability program (e.g., manufacturing for pumps, seals, valves and controls; foundry operations; and service centers), and covers safety and sustainability efforts for 2016.

The Flowserve team maintains a focused approach to keeping internal operations, and those of our customers, more sustainable in the marketplace, while looking for continued success and accomplishments in safety and sustainability. The report celebrates the diversity, inclusion and sustainability contributions by Flowserve associates to their workplaces, communities and the world in over 40 countries, serving thousands of customers.

Our products and services enable customers to operate in an environmentally responsible manner. Simultaneously, we work to protect the environment by monitoring and enhancing our performance each day. In addition, we see the importance of treating our employees with respect and fairness, while helping to make a difference in communities around the world.

It is hoped that you will find this report useful and enlightening as Flowserve shares the lessons learned and applied during this, our most recent sustainability reporting period.
