

NEC Highlights Environment, Society and Governance Activities for the 2017 Fiscal Year

NEC Corporation announced the release of its Corporate Social Responsibility (CSR) Report 2017, reflecting the activities and the achievements supporting the Environment, Society and Governance (ESG) from April 1, 2016 to March 31, 2017 (hereafter FY2017).

The CSR Report provides an outline of activities and goals toward the realization of sustainable management, focusing on society and governance.

NEC prioritizes the sustainable development of both society and the NEC Group under the theme of “materiality.” As part of this, NEC has been improving performance outside of the financial field and ensuring the soundness of management. Within this transforming business environment, and corresponding to the expectations of society, NEC started to review materiality in FY2017 and to reconfirm its contributions.

NEC’s CSR Report features dialogue between experts, NEC executives and employees on sustainable management, society and investment in order to capitalize on this knowledge and improve sustainable management.
