

Sanofi 2018 Integrated Report Presents Its Responsibility for the Future

May 14, 2019—For the third year, Sanofi has published its Integrated Report, "Our Responsibility for the Future".

This year, the report took on a shorter, bolder format. In this latest edition, we illustrate our commitments and long-term value creation for all stakeholders, giving them a clear, concise, and comprehensive vision of our business model. We also provide key information about the company, its strategy, its value creation, and its sustainable governance, as well as its financial and non-financial performance.

Based on three pillars—"Who we are," "What we stand for," and "Where we are going,"—the report highlights the economic, social, environmental and governance challenges that Sanofi is determined to address as a responsible corporate citizen. While continuously improving the company's contribution to healthcare around the world, Sanofi aims to reduce its impact on the environment and work towards a more inclusive and diverse world.

The report was written in accordance with the Global Reporting Initiative (GRI) standards, using the reference framework published by the International Integrated Reporting Council (IIRC). It outlines, through its form and initiatives, Sanofi's contribution to the United Nations objectives in the field of sustainable development.

Through this synthetic, global and forward-looking vision of Sanofi's strategy, activities, and commitments, this integrated report is intended to provide a complementary reading of the 2018 Sanofi Form 20-F document.

The 2018 Integrated Report is available in PDF and digital versions.
